

CLEAN MATTE enables both superior design and easier cleaning.

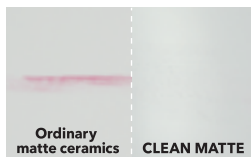

## An elegant texture you'll want to touch

We achieved a smooth texture that had been impossible with ordinary matte ceramics, while at the same time enhancing the design to give off a gentle, silky light unlike ordinary gloss ceramics.

## A matte finish with outstanding cleanability

Ordinary matte ceramics have a reputation for hanging on to dirt, but the unique way CLEAN MATTE ceramics from TOTO are processed means that any clinging dirt can easily be washed away.

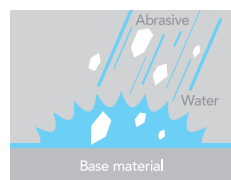

\*Tests were conducted using a water-dampened sponge to wipe away oily grime applied to the ceramic surface.

## About CLEAN MATTE technology

Compressed air is used to blast the glaze-covered surface of the ceramic with a slurry of water and abrasive—an advanced technology that enables microscale processing.

Ordinary matte ceramics have a jagged surface that tends to retain dirt. CLEAN MATTE achieves uniform, micro-level undulations for a smoother surface that makes dirt removal easier while also improving design.
